## **NEW W2 BY WETSTYLE LINE READY FOR DELIVERY**

*Line Offers Elegant and Original Bath Furnishings at a Lower Price Point*

**MONTREAL, CANADA (Sept.15, 2015)** – [WETSTYLE](#), a Montreal-based manufacturer of premium-quality bath furnishings, announced today that [W2](#) by WETSTYLE is now officially available and ready to ship to showrooms and customers. The new line, created with the same attention to form and function as WETSTYLE products, includes three freestanding soaking tub designs and a new all-wood furniture collection with a slim profile integrated washbasin. Designed to make a statement in smaller bathroom spaces, the W2 line offers elegant transitional designs at value-based price points.

“WETSTYLE’s W2 brand was made with elegant and savvy consumers in mind – homeowners who want to make the most of their space without compromising timeless style,” said Mark Wolinsky, president of WETSTYLE. “Available at a lower price point, W2 allows WETSTYLE to reach a broader audience of people passionate about bold and original designs for their homes.”

### **W2 Features & Dimensions**

- The [W2 Cloud Tub](#) has a delicately rolled rim and beautiful lines that give it a timeless transitional look. The tub transforms into a statement piece with the addition of an optional base.
- The [W2 Wave Tub](#), inspired by a gently rolling ocean wave, is small enough to fit in a standard 60” x 30” alcove. Nestled perfectly between three existing walls as a freestanding tub, there is no need for a costly remodel to create instant elegance.
- The [W2 Straight Tub](#) boasts a modern profile, with tapered lines and rounded corners. This tub offers another way to upgrade a standard alcove space, floating between the walls for a chic statement.
- The [W2 ELEMENT Collection](#) includes an uplift mirrored cabinet, linen cabinet and vanities in four lengths—with the smallest measuring a slim 24”. The collection features premium touches such as soft close doors and drawers, flat cut oak, integrated hand pulls and fully finished interiors that match the exterior. The smooth basin design of the slim profile washbasin offers a contemporary contrast with the square shape of the exterior, bringing an unexpected yet intriguing element to the bathroom. W2 furniture is available in mocha and charcoal grey tones.

All W2 bathtubs and sinks are manufactured by hand with award-winning [WETMAR BiO™](#), an eco-friendly natural stone composite material, lending strength, durability, slip resistance and natural thermo-insulation. Each tub model features a slot design hidden overflow channel to the drain, simplifying installation by eliminating the need for external plumbing additions.

To order W2 for display or purchase, find an authorized W2 dealer by filling out the form provided on WETSTYLE's [W2 Dealer Locator Page](#). For additional information and images, visit the [Wetstyle website](#), and connect with us on [Twitter](#) and [Pinterest](#).
