

## CLEANING GUIDE

All WETSTYLE products are manufactured with **WETMAR BiO™**, an ultra-smooth, non-porous material that helps keep grime and calcium deposits in check.

Le **WETMAR BiO™** is ultra-easy to clean: after each use, simply wipe with a soft cloth to remove any surface dirt.

For standard cleaning of both True High Gloss™ and matte finishes, we recommend using widely available cleaning products such as Mr. Clean, Fantastik, CIF, etc. The matte finish may occasionally require a mildly abrasive product.

**Never use** petroleum-based products when cleaning, i.e. paint thinners or other solvents, as they may damage the **WETMAR BiO™** surface. (Note: Personal hygiene products and cosmetics will NOT damage the surface.)

### Standard Cleaning

#### WETMAR BiO™, True High Gloss™

Wipe surface with a soft cloth after each use.

Use a mild cleaning product such as Mr. Clean, Fantastik, CIF, etc.

Do not use abrasive products or cream cleansers.

#### WETMAR BiO™, matte finish

Wipe surface with a soft cloth after each use.

Use a mild cleaning product such as Mr. Clean, Fantastik, CIF, etc.

For more difficult stains, use a mildly abrasive cream cleanser such as Soft Scrub, Comet Soft Cleanser, Cream with Bleach or CIF.

### Scratched or Damaged Surfaces

To repair scratched or damaged surfaces, sand the area using 600-, 800- and 1200-grit sandpaper: begin with the lower number (coarser) grit followed with each higher number (finer) grit in ascending order. Finish by polishing the surface using a cloth and white polishing compound for automobiles.

### Repairs

For more extensive repairs, send a photograph of your WETSTYLE product to our Customer Service Department ([service@wetstyle.ca](mailto:service@wetstyle.ca)), who will inform you as to the most appropriate methods to use..
