THE WETSTYLE COLLECTIONS

BATHTUBS AND LAVATORIES

All WETSTYLE soaking bathtubs, lavs and vessel sinks are crafted by hand from WETMAR™, the company's proprietary, patent-pending, environmentally friendly natural stone composite material, and are available in a True High Gloss or Matte White finish. They are custom-made to order at the WETSTYLE factory in Beloeil, Canada.

CUBE

WETSTYLE's debut collection, CUBE's striking geometric forms and tremendous versatility first put the brand on the bathroom fixture design map. The 12 bathtubs are either perfectly rectangular or slightly tapered in shape. As spacious as they are luxurious, most are large enough to accommodate two bathers. CUBE tubs can be adapted and installed to suit any bathroom configuration: freestanding to create a dramatic focal point, or against a wall, in a corner, recessed against 3 walls, or in a sunken design.

The sleek, practical design of the CUBE lavs offers a modern interpretation of the stone washbasins still used in the French countryside. Each of the 13 countertop models is a dramatic take on a rectangular vessel sink. The line features a broad range of head-turning styles, ranging from the slab-like silhouettes of the VC 48 and VC 60 models to the trough design of the VC 848A, an ideal option for upscale hospitality projects.

OVE

Fittingly oval-shaped with narrow or wide rims, the three tubs of the OVE collection are seductively cocoon-like, providing soothing sanctuary from the outside world. Each is freestanding and designed to delight the eye from all angles, making an OVE tub a sculptural addition to a sumptuous bath for both contemporary and transitional tastes.

The sensual, curved theme of the tubs carries through to the 12 OVE lavs, which are available in round, elliptical or rectangular models, in an array of sizes. The rectangular models feature oval interior basins.

FURNITURE

Like its bathtubs and lavs, WETSTYLE's furniture collections are custom-made to order using the highest quality materials and craftsmanship. Available in sizes ranging from 24 to 72 inches in length, the collections offer an unparalleled level of customization and flexibility. The woods are selected, assembled and finished by hand, and are "book matched" to maintain consistency in the grain pattern across all front, end and top faces. All collections also feature premium hardware and drawer glides. The marine-grade finish is rated Level 5 by the American Woodworking Institute, its highest distinction for moisture resistance, durability, stain resistance and overall quality.

Wood

F Collection

Simple yet sophisticated, the furniture of the F Collection has a subtly exotic, Asian-inspired appeal. Crafted from rift-cut oak, the four consoles are available in a range of sizes and feature recessed handles and two drawers for ample storage. The collection comes in Natural, Wenge, White-Washed, Grey-Washed, and White finishes. Two wood-framed mirrors complete the collection.

Z Collection

The Z Collection features a more streamlined silhouette than the F Collection, but is crafted from the same rift-cut oak and is available in the same finishes. The five consoles come in a range of sizes and styles, some of which have one or two small drawers.

Niche Collection

Designed to complement the CUBE bathtub collection, this chic storage furniture provides a perfect place for towels, bath products and other bath accessories. Available in freestanding or wall-mounted models, it's crafted from rift-cut oak and comes in the same finishes as the F and Z Collections.

Stainless Steel

C Collection

The four stainless steel consoles that comprise this unique collection range from 24 to 60 inches in length and lend a spare, striking metallic touch to a luxurious bath. Invisible joints and a sparkling Mirror or Brush finish testify to the furniture's exceptional quality. Each console houses a slim-profile WETMAR™ integrated countertop, which is molded in one piece to ensure the continuity of the surface. Three stainless steel framed mirrors complete the collection. Chic and minimalist, they can be configured vertically or horizontally.
